**Usage of operating systems for websites**

This diagram shows the percentages of websites using various operating systems. See [technologies overview](#) for explanations on the methodologies used in the surveys. Our reports are updated daily.

Request an extensive market report of operating systems.

[Learn more](#)

How to read the diagram:

Unix is used by 68.9% of all the websites whose operating system we know.

|                                                                                                                                                  |       |
|--------------------------------------------------------------------------------------------------------------------------------------------------|-------|
| <b>Unix</b>                                                                                                                                      | 68.9% |
| <b>Windows</b>                                                                                                                                   | 31.1% |
| W3Techs.com, 8 January 2019<br>Percentages of websites using various operating systems<br>Note: a website may use more than one operating system |       |

The following operating systems are used by less than 0.1% of the websites
