Usage of web servers for websites

This diagram shows the percentages of websites using various web servers. See technologies overview for explanations on the methodologies used in the surveys. Our reports are updated daily.

Request an extensive market report of specific web servers.

Learn more

How to read the diagram:
Apache is used by 44.5% of all the websites whose web server we know.

| Web Server	Percentage
Apache	44.5%
Nginx	40.8%
Microsoft-IIS	9.0%
LiteSpeed	3.8%
Google Servers	0.9%
Node.js	0.6%
Apache Traffic Server	0.5%
Tomcat	0.4%
IdeaWebServer	0.3%
Cowboy	0.1%
Tengine	0.1%
Lighttpd	0.1%
Kestrel	0.1%

W3Techs.com, 8 January 2019

Percentages of websites using various web servers
Note: a website may use more than one web server

The following web servers are used by less than 0.1% of the websites

- Oracle Servers
- Gunicorn
- Caddy
- IBM Servers
- Zope
- Jetty
- WEBrick
- Kangle

Technology Brief

Web Servers

Web servers are programs that enable a computer to present web pages on the Internet.
